Venetian Blinds - Technical Information

Price & Company Ltd
Serving Customers Since 1850

RETAIL price list inc VAT

Issued 27th January 2014

All prices are in £

How to order:

To ensure we can process your orders as quickly and efficiently as possible the following information will need to be detailed on the order form

Measuring:

The width and drop for each blind must be clearly specified, to the nearest 0.1cm. Please be aware of the following when measuring:

	max width	max drop	max area	min width	min drop
15mm	300cm	300cm	6m ²	25cm	20cm
25mm	400cm	400cm	12m ²	25cm	20cm
35mm	400cm	300cm	6m ²	32cm	20cm
50mm	400cm	300cm	12m ²	32cm	20cm
Unity	200cm	300cm	6m ²	42cm	20cm
Side Guide Tilt 15mm	175cm	250cm	4m ²	35cm	20cm
Side Guide Tilt 25mm	175cm	250cm	4m ²	35cm	20cm
Side Guide Roof 25mm	150cm	250cm	3m ²	35cm	20cm
Perfect Fit Cord	150cm	300cm	6m ²	25cm	8cm
Perfect Fit Tabbed	130cm	200cm	2.2m ²	25cm	20cm

If ordering a blind size that lies between the measurements given on the pricing table, the price charged will be that of the next size up.

Double glazing and partition blinds are also subject to the standard minimum and maximum widths/drops as detailed above.

The order form also needs to specify which measurement has been taken:

Exact This measurement is the exact area you would like the blind to cover.

Recess This measurement should be calculated by measuring the recess width from wall to wall in 3 places and the drop from the top of the recess to the window sill in three places.

Slat Width:

Choose from a slat width of either 15mm, 25mm, 35mm or 50mm (See individual slats for availability)

Finish:

Different finishes are available - **V15** and **V25** prices refer to standard matt, gloss, or metallic slat.

V15SE and **V25SE** prices refer to slat with the following finishes:

Pearlised - Glacier, Sparkle Black, Spring Blush, Midnight Blue, Fern Green, Shiny Silver, White Shimmer, Barely Black, Champagne

Soft Sheen - Snowflake, Calico, Sunrise, Creamy Apricot, Ice Pink, Blue Haze, Cool Sky, Peppermint

Perforated - Filtra Silver, Filtra White, Filtra Magnolia, Filtra Black

Structure - Alpine, Elderberry, Scottish Pine, Sugar Maple, Chestnut, American Elm, Hornbeam, Conker, Cherry, Mahogany

Aluwood - Alpine, Elderberry, Scottish Pine, Sugar Maple, Chestnut, American Elm, Hornbeam, Conker, Cherry, Mahogany

Stripes - Pinstripe, Classic Stripe

Operation:

Each blind can be tilted, raised and lowered by separate controls.

15mm & 25mm tilting is by wand. 35mm & 50mm tilting is by two cords. Please specify whether this control is required on the **left** or **right**. To raise and lower the blind cords are used. Please specify whether the cords are needed on the **left, right or separate sides**.

Features:

Side Guide Tilt - Ideal for windows that tilt up to 15 degrees from the vertical. All controls must be fitted on the same side.

Side Guide Roof - Ideal for Velux® or roof windows. The unique guide wire holds the slats in place at an angle of up to 45 degrees from the vertical. All controls must be fitted on the same side. Only available in 25mm slats. Side guide tilt and roof blinds come with a tilt rod retainer which should be fitted at the side of the blind.

Partition blinds* - Partition blinds use a flexible tilt mechanism and can normally only be tilted and not raised or lowered.

Double Glazing* - Double glazing blinds are supplied with a tilt/torsion rod and bowden cable and can be tilted, raised or lowered. All controls must be fitted on the same side.

*Available in 15mm, 25mm and 35mm slat only.

If ordering any of the above blinds an asterisk should be placed over the 15 or 25 in the slat width box. Then in the special instructions box place another asterisk and write clearly the blind type required

Additional Information:

15mm, 25mm and 50mm blinds are supplied with co-ordinating ladder, cord, headrails and bottom rails.

35mm blinds are only available with white ladder, cord, headrails and bottom rails.

15mm and 25mm blinds are supplied with a headrail that is 27mm wide x 19mm deep

35mm and 50mm blinds are supplied with a headrail that is 40mm wide x 40mm deep

All blinds are supplied with standard swivel brackets or universal extension brackets. 50mm blinds have an enclosed bottom rail.

Cord lock for 35mm and 50mm blinds is different due to the headrail profile.

Control options available- Split (raise lower right, tilt left), or both left or both right.

6 colours available on 25mm slat.

15 colours available on 35mm slat.

19 colours available on 50mm slat.

6 colours available on 63mm slat.

Tape option available at a 20% surcharge.

Metal cord pulls available at a £4 surcharge

All wooden blinds come with a metal headrail.

Please Note:

The sizes in inches are for guidance only and are not an exact conversion of the metric size.

The metric size will be used for pricing purposes.

*Blinds over 200cm wide are not available in 25mm stat.

*Control options cannot be changed for blinds over 200cm wide.

How to order:

To ensure we can process your orders as quickly and efficiently as possible the following information will need to be detailed on the order form.

Measuring:

The width and drop for each blind must be clearly specified, to the nearest 0.1cm.

Please be aware of the following when measuring:

	25mm	35mm	50mm	63mm
Min width	32cm	32cm	32cm	32cm
Max width	200cm	242cm	242cm	242cm
Min drop	20cm	20cm	20cm	20cm
Max drop	300cm	300cm	300cm	300cm
Max Area	4 sq mtrs	4.8 sq mtrs	4.8 sq mtrs	4.8 sq mtrs

If ordering a blind size that lies between the measurements given on the pricing table, the price charged will be that of the next size up.

The order form also needs to specify which measurement has been taken:

Exact This measurement is the exact area you would like the blind to cover.

Recess This measurement should be calculated by measuring the recess width from wall to wall in 3 places and the drop from the top of the recess to the window sill in three places.

Stacking:

Due to the thickness of the wood slat it is important that the customer is aware of the stack size for the blinds. The following details are for guidance only and should be increased by 10% for blinds supplied with tape.

Approximate stack size				
Drop of blind	25mm blind	35mm blind	50mm blind	63mm blind
50cm	12cm	11cm	11cm	11cm
100cm	17.5cm	16cm	15.5cm	14cm
150cm	23cm	20cm	20cm	17cm
200cm	28cm	25cm	24.5cm	20cm
250cm	33cm	29.5cm	29cm	23cm
300cm	38cm	34cm	33.5cm	27cm

Slat Width:

Choose from a slat width of either 25mm, 35mm, 50mm or 63mm (See individual slats for availability)

Operation:

Each blind can be tilted, raised and lowered by separate controls. Cords are used to raise and lower the blind. Please specify whether the cords are needed on the left or right, or on separate sides.

If split controls are required, the tilt cords must be on the left with the cord lock on the right.

All control cords and wooden acorns are colour co-ordinated with the wood slats.

Options:

Blinds can be ordered with either a ladder or tape.

25mm and 35mm blinds have a tape width of 18mm. 50mm and 63mm blinds have a tape width of 25mm.

The colour reference chosen should be stated on the order form. Metal cord pulls in two styles

Bell and Barrel are an optional extra.

Fittings:

A standard valance to match the wood slats is also included. Blinds measured recess will be supplied with a straight valance, blinds measured exact will be supplied with a valance that covers the end of the rail. There are further options when fitting blinds side by side or in a bay window. A non-standard valance can be ordered up to a width of 484cm.

Additional Information:

25mm and 35mm blinds are supplied with a headrail that is 40mm x 40mm. 50mm and 63mm blinds are supplied with a headrail that is 59mm x 40mm.

Mixed colour Wood Blinds are not available. All blinds supplied with end fix brackets. Larger blinds will be supplied with U shaped centre support brackets which can either be face fixed or top fixed.

Expressions Blinds - Technical info

RETAIL price list inc VAT
Issued 27th January 2014
All prices are in £

How to order:

To ensure we can process your orders as quickly and efficiently as possible the following information will need to be detailed on the order form.

Measuring:

The width and drop for each blind must be clearly specified, to the nearest 0.1cm. Please be aware of the following when measuring:

	38mm	50mm	63mm
Min width	32cm	32cm	32cm
Max width	259cm	259cm	259cm
Min drop	20cm	20cm	20cm
Max drop	300cm	300cm	300cm
Max Area	4.8sq m	4.8sq m	4.8sq m

If ordering a blind size that lies between the measurements given on the pricing table, the price charged will be that of the next size up.

The order form also needs to specify which measurement has been taken:

Exact This measurement is the exact area you would like the blind to cover.

Recess This measurement should be calculated by measuring the recess width from wall to wall in 3 places and the drop from the top of the recess to the window sill in three places.

No allowance made on drops for either Recess or Blind Size drop measurement. Drops made to tolerance + - 3mm on both blind and recess sizes. To help with the measuring and fitting of expressions, you need to be aware of the size blind you will receive.

Please use the following chart to identify the number of ladder and tapes that will be supplied in the blind:

Blind width (cm)	No ladders	No. tapes
32 - 55	2	2
55.1 - 91	3	2
91.1 - 127	4	4
127.1 - 151	5	3
151.1 - 187	6	4
187.1 - 223	7	5
223.1 - 259	8	6

For a 100cm blind, the following specifications apply:

	100cm exact	100cm recess
Headrail Width	99.6cm	98.6cm
Headrail incl. brackets	100cm	99cm
Headrail & valance	101.6cm	99cm
Slats width	100cm	99cm

Stacking:

Due to the thickness of the slat it is important that the customer is aware of the stack size for the blinds. *For 50mm blinds with tape, this figure increases by 10%

Approximate stack size			
Drop of blind	38mm blind	50mm blind	63mm blind
65cm	12cm	13cm*	11cm
100cm	16cm	15cm*	13cm
150cm	20cm	18cm*	16cm
200cm	24cm	21cm*	18cm
250cm	28cm	24cm*	21cm
300cm	33cm	27cm*	23cm

Slat Width: Choose from a slat width of either 38mm, 50mm or 63mm in wood grain, or 50mm only in High Shine and Silk finishes

Tapes & Pricing:

Slat colour	Tape Colour	Price Table	Slat Colour	Tape Colour	Price Table
Snow	White	A	Cinder	Jet	A
Chiffon	Pearl	A	High Shine White	White	B
Haze	Grey	A	High Shine Ivory	Pearl	B
Medium Oak	Sand	A	High Shine Black	Jet	B
Autumn Gold	Tan	A	Silk White	White	B
Rustic Oak	Earth	A	Silk Ivory	Pearl	B

Operation:

Cords are used to raise and lower the blind. Each blind is tilted left side and raised/ lowered right side. All control cords and acorns are colour co-ordinated with the slats. A cord consolidator is fitted to all blinds to assist with child safety, a child safety device is still required. Blinds wider than 139cm will be fitted with Easilift operation

Valances:

A standard valance to match the slats is included. Blinds measured recess will be supplied with a straight valance, blinds measured exact will be supplied with valance returns that cover the end of the rail. There are further options when fitting blinds side by side or in a bay window. A non- standard valance can be ordered up to a width of 263cm. A valance clip is included to fix the valance to the headrail.

Additional Information:

38mm blinds are supplied with a headrail that is 39mm x 39.8mm. 50mm and 63mm blinds are supplied with a headrail that is 58mm x 39.4mm. Mixed colour Wood Blinds are not available. All blinds supplied with end fix brackets. Larger blinds will be supplied with U shaped centre support brackets which can either be face fixed or top fixed.

Standard Tape - 20%
Premium Tape - 25% (Sylvan Range Only)
Metal cord pulls available at £4 surcharge

Please Note:

The sizes in inches are for guidance only and are not an exact conversion of the metric size.
The metric size will be used for pricing purposes.

How to order:

To ensure we can process your orders as quickly and efficiently as possible the following information will need to be detailed on the order form.

Measuring:

The width and drop for each blind must be clearly specified, to the nearest 0.1cm.

Please be aware of the following when measuring:

	25mm	35mm	50mm	63mm
Min width	32cm	32cm	32cm	32cm
Max width	200cm	242cm	242cm	242cm
Min drop	20cm	20cm	20cm	20cm
Max drop	300cm	300cm	300cm	300cm
Max Area	4 sq mtrs	4.8 sq mtrs	4.8 sq mtrs	4.8 sq mtrs

If ordering a blind size that lies between the measurements given on the pricing table, the price charged will be that of the next size up.

The order form also needs to specify which measurement has been taken:

Exact This measurement is the exact area you would like the blind to cover.

Recess This measurement should be calculated by measuring the recess width from wall to wall in 3 places and the drop from the top of the recess to the window sill in three places.

Stacking:

Due to the thickness of the wood slat it is important that the customer is aware of the stack size for the blinds. The following details are for guidance only and should be increased by 10% for blinds supplied with tape.

Approximate stack size				
Drop of blind	25mm blind	35mm blind	50mm blind	63mm blind
50cm	12cm	11cm	11cm	11cm
100cm	17.5cm	16cm	15.5cm	14cm
150cm	23cm	20cm	20cm	17cm
200cm	28cm	25cm	24.5cm	20cm
250cm	33cm	29.5cm	29cm	23cm
300cm	38cm	34cm	33.5cm	27cm

Slat Width:

Choose from a slat width of either 25mm, 35mm, 50mm or 63mm (See individual slats for availability)

Heritage, Colours and Rustic blinds are available in 50mm slats only

Operation:

Each blind can be tilted, raised and lowered by separate controls. Cords are used to raise and lower the blind. Please specify whether the cords are needed on the left or right, or on separate sides.

If split controls are required, the tilt cords must be on the left with the cord lock on the right.

All control cords and wooden acorns are colour co-ordinated with the wood slats.

Options:

Blinds can be ordered with either a ladder or tape.

25mm and 35mm blinds have a tape width of 18mm. 50mm and 63mm blinds have a tape width of 25mm.

The colour reference chosen should be stated on the order form. Metal cord pulls in two styles Bell and Barrel are an optional extra.

Fittings:

A standard valance to match the wood slats is also included. Blinds measured recess will be supplied with a straight valance, blinds measured exact will be supplied with a valance that covers the end of the rail. There are further options when fitting blinds side by side or in a bay window. A non-standard valance can be ordered up to a width of 484cm.

Additional Information:

25mm and 35mm blinds are supplied with a headrail that is 40mm x 40mm. 50mm and 63mm blinds are supplied with a headrail that is 59mm x 40mm.

Mixed colour Wood Blinds are not available. All blinds supplied with end fix brackets. Larger blinds will be supplied with U shaped centre support brackets which can either be face fixed or top fixed.

Vertical Blinds Technical Info:

How to Order:

To ensure we can process your orders as quickly and efficiently as possible the following information will need to be detailed on the order form.

Measuring:

The **width** and **drop** for each blind must be clearly specified, to the nearest 0.1cm.

Please be aware of the following when measuring:

	max width	max drop	min width	min drop
89mm / 127mm	500cm	400cm	25cm	13.5

A minimum drop of 50cm is applied to louvres with branded pockets. The order form also needs to specify which measurement has been taken:

Exact - This measurement is the exact area you would like the blind to cover.

Recess - This measurement should be calculated by measuring the drop from the top of the recess to the windowsill in three places and the width by measuring the recess from wall to wall in three places.

If ordering a blind size that lies between the measurements given on the pricing table, the price charged will be that of the next size up.

Operation:

Vertical blinds are controlled using cords, please specify whether you require these on the **left** or **right**.

The blind can be made to either draw to the **left**, **right** or the bunch of louvres can be **split** to both sides.

Headrails:

Headrails are available in either **white** (89mm and 127mm) or **brown** (89mm only)

All visible components are colour matched to the headrail.

Headrail size (89mm and 127mm) - 44mm wide x 25mm deep

Additional Information:

Tilt control chain (that controls the angles of the louvres) are plastic.

Blinds are supplied with either **face fix**, **top fix** or universal extension brackets that co-ordinate with the headrail.

Braided Sphere / Bell / Barrel pulls £3
Braided Acorn / Ribbed cylinder pulls £5

Please Note:

The sizes in inches are for guidance only and are not an exact conversion of the metric size.
The metric size will be used for pricing purposes.

How to order:

To ensure we can process your orders as quickly and efficiently as possible the following information will need to be detailed on the order form.

Measuring:

The **width** and **drop** for each blind must be clearly specified, to the nearest 0.1cm.

See the fabric specification table for maximum width and drops

The order form also needs to specify which measurement has been taken:

Exact This measurement is the exact area you would like the blind to cover.

Recess This measurement should be calculated by measuring the recess width from wall to wall in three places and the drop from the top of the recess to the window sill in three places.

If ordering a blind size that lies between the measurements given on the pricing table, the price charged will be that of the next size up.

Fabric:

Both the fabric name and colour should be clearly written on the order form.

Commercial Fabric:

Shapes 1 only. No pulls or decorative trims allowed. Blinds supplied with metal bottom bar.

Duoscreen 353 and polyscreen 650 will have a pattern running in the opposite direction for blinds with widths over 246cm wide.

Dapple will have the pattern running in the opposite direction for blinds with widths over 196cm wide.

Shapes:

Shapes 5 and 6 are available only with a sidewinder.

All shapes are supplied double thickness and must be in the same fabric and colour as the blind.

Shapes cannot be ordered separately.

Braid:

If ordering braid the trim design needs to be stated and the colour reference given. Please refer to the braid card at the front of the Dimensions Roller book.

Poles / Pulls:

If ordering a pole or a pull check the option is available with the shape you have chosen.

Operation:

Blinds are available on a standard or Easi-Fit system, with an option of sidewinder or spring mechanism.

Please specify which control type you require, L - luxury, SL - sidewinder Left, SR - sidewinder right, EL - Easi-Fit left, ER - Easi-Fit right and ES - Easi-Fit spring.

Standard spring mechanisms are available on blinds up to 2 metres wide and are made with a 25mm barrel.

Standard sidewinder mechanisms are available in 2 sizes:

Blinds up to 2m wide are made with a 25mm barrel.

Blinds from 2m to 3m wide are made with a 36mm barrel.

	min width	min drop
Spring	34cm	20cm
Sidewinder	15cm	20cm

Easi-Fit spring mechanisms are available up to 2m wide and will be supplied on a 32mm system.

Easi-Fit sidewinder mechanisms are available in 2 sizes:

Blinds up to 2m wide are made with a 32mm system.

Blinds from 2m up to 3m will be made with a 45mm system

	min width	min drop
Spring	45cm	20cm
Sidewinder	15cm	20cm

Additional Information:

A choice of brackets are available in white and brown.

Brown brackets and chain not available for Easi-fit system 45mm.

White bracket covers available for Easi-Fit system 32 and 45.

If the blind ordered is outside the maximum specification and the blind can be turned the blind will be made with the grain running in the opposite direction.

Whenever possible we will avoid joining a fabric.

Blackout fabric cannot be joined.

If you require additional order forms please contact the Sales Office.

Available Pleated

Key for Joining & Turning

A = possible with insignificant visible difference.

B = possible but noticeable.

N = not possible.

U = Unturned.

T = Turned.

If fabric can be joined it would normally give a maximum blind size 300cm x 300cm, with a horizontal join.

SMM: Standard Manufacturing Method indicates the way the fabric is used to make a blind as it comes off the roll.

Tri fold on classic is allowed - with waived warrantee. Fixed open and fixed closed louvres have a a dressed up and dressed down option.

The break point in solid base louvred top shutters is calculated in the same way as a break point on t on t shutters.

Door option means larger base and top rails and more hinges. Barrel bolts can only be fitted to 50.8mm stiles.

Security bolts can be fitted to top, bottom or top and bottom of a non hinged (50.8mm only) stile on a panel.

French door cut outs will be special paper only order. There are two door knobs. A & B

There are lots of new frames and some discontinuations:

Discontinued

serrate Z 38mm

zenith L 37mm

zenith L 50mm

zenith L 63mm

zenith L 76mm

There are some new motorised option in development likely to include a mains power adaptor, rechargeable solar option, and standard battery operation. We are looking at introducing a wand for inaccessible shutters..
